

DON'T TAKE THE SWINE FLU SHOT IT CONTAINS LIVE VIRUS & SQUALENE AND WILL INFECT YOU AND OTHERS

MANUFACTURERS HAVE BEEN GRANTED FULL IMMUNITY AGAINST INJURY CLAIMS - WHY IF THEY ARE SO SAFE"?
WHY AREN'T WE BEING SHOWN THE INGREDIENTS?
WHY ARE THE VACCINES APPROVED WITHOUT TESTING?

Swine Flu Mass Vaccination Programs - 2009/2010

In the case of the 1976 swine flu pandemic, a government-directed mass vaccination program, several dozen vaccine recipients died and hundreds were injured. Those families who were able to sue and won were awarded millions of dollars for the injuries caused by the untested vaccine formulations.

Symptoms of Vaccine Injury

- Inability to focus at school and at home. Lack of eye contact.
- Depression, moodiness; tendency to overreact emotionally.
- Delayed or unusual speech patterns such as high pitched or flat intonation; lack of slang or "kidspeak."
- Hyper or hypo sensitivity to light, sound, crowds and other external stimulation.
- Difficulty with fine and gross motor skills such as handwriting, athletic coordination and endurance sports such as running and swimming.
- Difficulty in making and keeping friends later in life.
- Asthma and diet issues.
- Conditions often labeled as ADD/ADHD such as inattention, hyperactivity, and impulsivity.
- Significant abnormal bowel function or vasculitis. {Source: *Infection and Autoimmunity* by Yehuda Shoenfeld, Noel R. Rose}
- Birth defects including, cleft palate, microcephaly or pyloric stenosis. {Source: *American Journal of Epidemiology*, "Delivering Influenza Vaccine To Pregnant Women", by David M. Ayoub, MD }
- Guillian Barré Syndrome, a neurological disorder. {Source: U.S. Centers for Disease Control}

Many Studies Show that Vaccines are Not Effective

CHILDREN: "...no evidence that injecting children 6-24 months of age with a flu shot was any more effective than placebo."
Reference: "Vaccines for preventing influenza in healthy children.", The Cochrane Database of Systematic Reviews. 2 (2008).

ASTHMA: "The inactivated flu vaccine does not prevent influenza-related hospitalizations in children, especially the ones with asthma... Children who get the flu vaccine are three times more at risk for hospitalization than children who do not get the vaccine."
Reference: The American Thoracic Society's 105th International Conference, May 15-20, 2009, San Diego.

HEALTHY ADULTS: "Vaccination of healthy adults only reduced risk of influenza by 6%..." Reference: Vaccines for preventing influenza in healthy adults. The Cochrane Database of Systematic Reviews. 1(2006).

THE ELDERLY: "Flu shots were non-significant for preventing the flu in elderly living in nursing homes. For elderly living in the community, vaccines were not (significantly) effective against influenza, ILI or pneumonia..." Reference: "Vaccines for preventing influenza in the elderly." The Cochrane Database of Systematic Reviews. 3(2006).

PREGNANT WOMEN: FDA and manufacturer's insert indicate that the Flu shot should NOT be given to pregnant women whether it contains Thimerosal (mercury) or not. Without proof of fetal and reproductive safety, the CDC and Advisory Committee on Immunization Practices (ACIP) recommend that all

Squalene

Depending on the manufacturer, H1N1 may contain a potentially debilitating oil based adjuvant (additive) primarily composed of squalene (MF59, AS03, AS04). All laboratory rats injected with squalene (oil) adjuvants developed a disease that left them crippled, dragging their paralyzed hindquarters across their cages. Injected squalene can cause severe arthritis (3 on scale of 4) and severe immune responses such as autoimmune arthritis and lupus. **References:** (1) Kenney RT, Edleman, R. "Survey of human-use adjuvants." *Expert Review of Vaccines*. 2 (2003) p171; (2) Matsumoto, Gary. *Vaccine A: The Covert Government Experiment That's Killing Our Soldiers and Why GI's Are Only the First Victims of this Vaccine*. (2004) New York: Basic Books. p54.

Thimerosal (Mercury) and other Components

Thimerosal is heavily implicated as a major cause of the mass generational epidemic in developmental disorders (including the autism spectrum disorders, ADD, ADHD and OCD), endocrine-system dysfunction, and immune-system-related chronic diseases of the lungs, bowel, pancreas, liver and cardiovascular system. Studies show a "... 7 to 1 increase in relative risk of injury for children born to mothers who got a thimerosal-preserved flu shot in the first 4 lunar months of their pregnancy over matched mothers who did not." (*Birth Defects and Drugs in Pregnancy*, Heinonem, Slone, Shapiro, 1983) "Significantly increased risks of autism, speech disorders, mental retardation, personality disorders, thinking abnormalities, ataxia and NDs (neuro-developmental disorders) in general,... were associated with TCV (thimerosal) exposure." (*Neuroendocrinology Letters* Volume 27 No. 4 2006. Mark R. Geier. M.D., Ph.D. and David A. Geier). **Other components:** Formaldehyde (a neurotoxin and carcinogen), egg protein, contaminant viruses, antibiotics, and detergent.

Sanofi Pasteur's Fluzone® Vaccine Package Insert

Teratogenic effects: Pregnancy Category C: Animal reproduction studies have not been conducted with Fluzone vaccine. It is also not known whether Fluzone vaccine can cause fetal harm when administered to a pregnant woman or can affect reproduction capacity. Fluzone vaccine should be given to a pregnant woman only if clearly needed. **Carcinogenesis, Mutagenesis, Impairment of Fertility:** Fluzone vaccine has not been evaluated for carcinogenic or mutagenic potential, or for impairment of fertility.

WHAT CAN YOU DO? DO SOMETHING! Research the work of Dr sheeri tenpenny

- Print copies and distribute this flyer.
 - Give this information to everyone you know and love: Church members, social groups, school teachers, administrators, first responders (EMTs, paramedics, firemen), local police, council members, legislators. Their support is **critical** to maintain your right to choose.
 - Write letters to the editor in LOCAL community newspapers.
 - **DEMAND** that public schools are not used as mass vaccination sites.
 - Get this information out via the web using Facebook, MySpace or Twitter.
- Feel free to hot-link or post this information anywhere on the web.
